

Site Map Example Using Google Maps

Every event requires a site map. To create a site map, you can simply go onto Google Maps (Google.com/maps) and zoom into the event location and either hand mark or use Microsoft Word "Shapes" as shown below to indicate where all elements of your event will be located. Be sure to include every aspect of your event including: vendors, dumpsters, tents, stages, restrooms, electrical wiring, etc. Also be sure to create a legend below.

-  Craft Vendor
-  Food Vendor
-  Stage
-  Seating
-  Restrooms
-  Tables

-  Bounce House
-  Tent 40 X 60
-  Outdoor extension cord with rubber mat
-  Dumpster 8 yards
